Financial Card Personalization Solutions

Being a leading company on the market Matica Technologies considers innovation as a key element to keep its competitive edge. That is why our international team, formed by highly qualified engineers, located in the new production plant in Italy, has been continuously exploring and developing cutting-edge solutions.

THE SECURITY YOU NEED

Whatever your application requirements are, we ensure a perfect solution tailored to meet your specific situation. We offer a wide range of solutions for financial institutions starting from printers, instant and mid-range desktop solutions to the high performance modular systems able to combine card personalization functions with in-line mailing equipment to prepare your cards for delivery to each user.

Especially for financial applications, data protection begins with software. Matica system personalization software allows customers to meet PCI Data Security Standards (PCI-DSS). System controller PCs are shipped pre-configured with this preloaded software package. In addition, customized or advanced levels of security, auditing and event logging can be configured easily.

Fully compliant with all financial market standards, the Financial Card Issuance Line offers contact and contactless EMV Chip cards personalization. These solutions are capable of personalizing cards with the full range of card profiles, from embossing to indenting, encoding, tipping, color printing and laser engraving.

APPLICATIONS

- CREDIT & DEBIT CARDS
- PRE-PAID CARDS
- LOYALTY

Robust Engineering Cost Efficient Investment Protection

INSTANT CARD ISSUANCE

Matica's S3500 sets the pace for Instant Issuance capable to produce up to 700 cards. It is a new, versatile system to issue credit and debit cards in the most flexible way. The system design is based on proven in-house technologies with available modules for embossing, magnetic stripe encoding, direct to card printing and card feeding.

The Matica S3100, was developed to help financial institutions issue on-the-spot debit and pre-paid cards. It offers a high level of security with lockable card hoppers and ribbon compartments, and features a Kensington® lock to secure the cards while positioned on a countertop or table. It also includes an SD card slot for data security and built in management software.

LOW VOLUME SPECIALTY CARD ISSUANCE

The S5200 Series is an entry-level solution for cost-conscious service bureaus, card manufacturers and financial institutions to fulfill mid-sized card issuance programs. Incorporating Matica proprietary technologies, the S5200 product line combines reliability, flexibility and simplicity within a durably constructed system.

PRE-CONFIGURED SYSTEMS FOR MID-VOLUME CARD ISSUANCE PROGRAMS

Matica's new S6200 line is designed to meet specific needs of mid-volume issuers. It offers a selection of pre-configured floor standing card personalization systems for graphic printing, embossing and encoding options. Each configuration can operate in full autonomy or can upgrade into a platform of up to 5 modules.

This scalable solution can be linked with an inline card mailing system for a complete card-to-envelope solution. Based on Matica's well-known proprietary S7000 line, the S6200 series offers an entry-level solution into central card issuance at a low-cost ratio, while it is flexible to upgrade anytime for more demanding high-volume card issuance programs.

FLEXIBLE PLATFORM FOR MID TO HIGH VOLUME CARD PERSONALIZATION

The S7000 is the ultimate central issuance system you need. Its a la carte modular design can be configured to perfectly match your current needs, while at the same time, easily support any upgrades you may require in the future for increased performance or additional functionalities. There is an unlimited number of configurations for this extremely versatile system. S7000 is a complete solution for card personalization and fulfillment applications. In addition, it can be linked to a mailing system to provide a complete turnkey solution.
